

MAX-WIDTH

1. MAX-WIDTH

This div element has width: 500px;

This div element has max-width: 500px;

Tip: Drag the browser window to smaller than 500px wide, to see the difference between the two divs!

Keterangan:

<title>css max-width</title> : max-width (ID lebar maksimal) ini hampir sama dengan property width, bedanya fungsi dari max-width hanya mengatur lebar maksimal saja.

SOURCE CODE

```
<html>
<head>
<style>
div.ex1 {
    width:300px;
    margin: auto;
    border: 3px solid #73AD21;
}

div.ex2 {
    max-width:300px;
    margin: auto;
    border: 3px solid #73AD21;
}
</style>
</head>
<body>

<div class="ex1">This div element has width: 300px;</div>
<br>

<div class="ex2">This div element has max-width: 300px;</div>

<p><strong>Tip:</strong> Drag the browser window to smaller than 500px wide, to
see the difference between
the two divs!</p>

</body>
</html>
